

MOTO STOVE

ART. NO. PSG-203-16-1

Simple and reliable camping stove with two burners and wind protection—perfect for easy meals at the campsite or next to your campervan. Used directly with Primus gas canisters — no adapter needed.

- Compact camping stove for 2-5 people
- Two high-output 4400W burners for group meals
- Durable powder-coated steel body with wraparound windscreens
- Stainless steel and nickel-chrome cooking surface for easy cleaning
- Integrated Piezo igniter—no lighter needed
- Separate flame controls for simmering or boiling
- Built-in handle for easy transport and safe lighting
- Slim, low-profile design—easy to pack in your campervan or car
- Includes regulator, windscreens, pot support and flame adjusters
- Gas not included — use Primus Power Gas, Summer Gas, or Winter Gas (gas canisters featuring a standard Lindal valve — no adapter needed)

Fuel Consumption	318 g/h

The brass in this product contains more than 0,1 weight percent lead (CAS no 7439-92-1) which is on the REACH Candidate list of Substances of Very High Concern (SVHC). According to article 33 in the REACH regulation, a supplier or manufacturer must inform the recipient of the product as soon as it contains a listed substance exceeding 0,1 weight percent. Brass is often alloyed with lead to improve workability and machinability. The brass we are using usually contains around 3 percent lead and is primarily used in our gas valves and couplings. We are substituting those brasses with lead free brass in our products, but it will take some time before that process is finished. We do not use brass or lead in any parts or products that under normal circumstances will be in contact with food.
