

# Function Introduction

1. 8P Crimping Port
Crimps 8P (8P8C/RJ45) modular plugs; compatible with pass-through (feed-through) plugs.
2. 6P Crimping Port
Crimps 6P modular plugs.
3. Pass-through Cutting Blade
When crimping pass-through 8P plugs, this blade trims the excess conductors protruding through the head of the plug.
4.Crimping Mode Selector Switch
Crimping mode is switched by relocating the screw to a different mounting hole.
5.Storage Lock / Locking Latch
When the crimping tool is not in use, the latching mechanism can be engaged to hold the tool in the closed position, facilitating compact and convenient storage.
6. Shield-Clip Crimping Port (Strain-Relief Fold-over)
For folding/crimping the shield clip of Category 6A-and-above shielded plugs.
7. Stripping Port
Strips round network cables in the range of 3–8.5 mm.
8. Cutting Blade (Cutter)
Cuts cables.

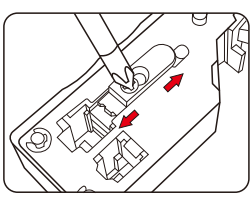

## CUTTING

*The blade is made of SK5 material, which cuts quickly and sharply. Maximum shear line diameter 10mm (Do not cut the steel wire)*

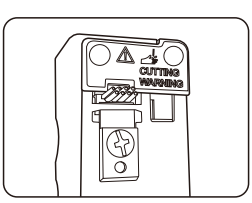

## STRIPPING

*Supports CAT 5-7 type cable outer sheath stripping 4-10mm.*

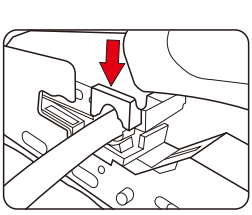

## SWITCHING

*The type of crimp can be changed by adjusting the screw position*

## CRIMPING PLUG

*Can support crimp 8P6P connectors, including CAT 5e/6/6A/7 type connectors. Can support pass through connectors.*

## CRIMPING CLIP

*The middle part of the crimping pliers can crimp the shielded connector dovetail clip*
